## Signal Table Lamp

**TL826**

Collection Name

**VEGA COLLECTION**

We may not know what or who is out there in the great expanse of space, but humankind has employed many means to try and uncover these unknowns. This pillar-like table lamp pays tribute to the signals released and listened for by astronomers which cross unfathomable distances bringing Earth tiny pieces of a giant puzzle. This matrix of signals is represented by repeating furrows which pulse sideways in a matched tempo creating a rich texture on the surface of this table lamp, the scores of which fall into contrasting highlights and shadows as the light is turned on.

Required modifications: Rod through centre for bolting to surfaces, bottom wired (unless specified otherwise) and all metal lacquered - no aesthetic changes.

**Compatible with**

Yacht Club
